Coverage Indications, Limitations, and/or Medical Necessity

Intensity Modulated Radiation Therapy (IMRT) is a technology in radiation oncology that delivers radiation more precisely to the tumor while relatively sparing the surrounding normal tissues. It is an advanced form of three-dimensional conformal radiation therapy (3D CRT) that allows for varying intensities of radiation to produce dose distributions that are more conformal than those possible with standard 3D CRT. It introduces inverse planning and computer-controlled radiation deposition, and normal tissue avoidance in contrast to the conventional trial-and-error approach.

The clinical objectives are defined mathematically and the IMRT optimization process determines the beam parameters that will lead to the desired solution while sparing normal tissues.

Examples of situations where IMRT is covered include tumors of the prostate, head and neck, brain, and paraspinal regions when needed to reduce the incidence and severity of the side effects of radiation, including compromise of visual function, mucositis, and xerostomia.

An IMRT candidate includes a patient who has already received a maximum amount of radiation delivered by conventional means. IMRT allows these patients to receive additional radiation safely, which can result in a prolonged survival and an improved quality of life.

The Current Procedural Terminology (CPT)/Healthcare Common Procedure Coding System (HCPCS) code(s) may be subject to National Correct Coding Initiative (NCCI) edits. This information does not take precedence over NCCI edits. Please refer to NCCI for correct coding guidelines and specific applicable code combinations prior to billing Medicare.

Services billed should be consistent with CPT code descriptors and Medicare valuation.

Coding Information

CPT/HCPCS Codes

Group 1 Paragraph:

Note: Providers are reminded to refer to the long descriptors of the CPT codes in their CPT book.

77385 and 77386 are MPFSDB status indicator "I", *not valid for Medicare purposes* as of 10/01/2019, but are applicable in an ASC setting. G0165 and G0166 are not payable in an OPSS setting.

ICD-10 Codes that Support Medical Necessity

Group 1 Paragraph:

It is the provider's responsibility to select codes carried out to the highest level of specificity and selected from the ICD-10-CM code book appropriate to the year in which the service is rendered for the claim(s) submitted.

Note: IMRT would only rarely be medically necessary for tumors of the right breast unless there is an underlying or associated condition for which extremely high precision is required and the reason for its use should be documented. This note applies to the following asterisked codes.

Noridian is establishing limited coverage for the following **CPT/HCPCS codes: 77385, 77386, G6015, and G6016.**

Note: Use ICD-10 code **D48.1** for Desmoid Tumor and Aggressive Fibromatosis.
