**Article Guidance**

**Article Text:**

The 4q25-AF Risk Genotype Test was developed to help predict the risk of atrial fibrillation and cardioembolic stroke. To date, there is insufficient evidence to support the required clinical utility for the established Medicare benefit category.

As reviewed, the developer described the indication to perform a 4q25-AF Risk Genotype Test as a risk assessment for developing a disease or condition. Risk assessment for developing a disease or condition in the absence of signs and symptoms of an illness or injury is also not defined as a Medicare benefit. Therefore, the 4q25-AF Risk Genotype Test would continue to be a statutory excluded service.

To receive a 4q25-AF Risk genotype service denial, please submit the following claim information:

- An Advance Beneficiary Notice (ABN) is not required for statutorily excluded services
  - For a voluntary issued ABN, append with GX modifier
  - To indicate a statutorily excluded service, append with a GY modifier
- Enter DEX Z-code™ identifier adjacent to the CPT® code in the comment/narrative field for the following Part B claim field/types:
  - Loop 2400 or SV101-7 for the 5010A1 837P
  - Item 19 for paper claim
- Enter DEX Z-code™ identifier adjacent to the CPT® code in the comment/narrative field for the following Part A claim field/types:

**Revenue Codes:**

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination.
