**Article Guidance**

**Article Text:**

STAT3 gene testing may be performed during the diagnosis of Autosomal Dominant Hyper IgE Syndrome (AD-HIES). Since management is not determined by the presence or absence of a STAT3 mutation in patients with a probable clinical diagnosis, the MolDX Contractor has determined STAT3 analysis is a statutorily excluded test.

To receive a STAT3 analysis service denial, please submit the following claim information:

- An Advance Beneficiary Notice (ABN) is not required for statutorily excluded services.
  - For a voluntary issued ABN, append with GX modifier
  - To indicate a valid ABN is on file for a known statutorily excluded service, append with a GY modifier
- Select the appropriate diagnosis for the patient
- Enter the appropriate DEX Z-Code™ identifier adjacent to the CPT® code in the comment/narrative field for the following Part B claim field/types:
  - Loop 2400 or SV101-7 for the 5010A1 837P
