Article Guidance

Article Text:

The following billing and coding guidance is to be used with its associated Local Coverage Determination.

LCD L35456 states, "Nerve blockade and/or electrical stimulation are non-covered for the treatment of metabolic peripheral neuropathy. The peer-reviewed medical literature has not demonstrated the efficacy or clinical utility of nerve blockade or electrical stimulation, alone or used together, in the diagnosis and/or treatment of neuropathic pain."

The use of peripheral nerve blocks for treating diabetic neuropathy is not considered reasonable and/or necessary and is not covered by Medicare Part A or B. Such use of peripheral nerve blocks is not supported by the current peer reviewed, published, evidence based scientific literature nor by specialty society guidelines. Claims are subject to review and recoupment.

This notification does not affect those regional/local blocks done as part of an operative procedure (for example wound debridement in the operating room) when performed as an adjunct to or the sole means of regional/local anesthesia for the procedure.

For somatic nerve blocks, it is inappropriate to bill for fluoroscopy (CPT® codes 77002 or 77003) with a 59 modifier when the procedure(s) billed on that date of service for the same patient by the same provider are included in the CPT® description of the procedure(s) performed.

Documentation Requirements

1. All documentation must be maintained in the patient's medical record and available to the contractor upon request.
2. Every page of the record must be legible and include appropriate patient identification information (e.g., complete name, dates of service(s)). The record must include the physician or non-physician practitioner responsible for and providing the care of the patient.
3. The submitted medical record should support the use of the selected diagnosis code(s). The submitted CPT/HCPCS code should describe the service performed.

Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

CODE	DESCRIPTION
999x	Not Applicable

Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all

Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.
