Article Guidance

Article Text:

The following coding and billing guidance is to be used with its associated Local coverage determination.

All the documentation requirements described in the Indications section of this LCD must be met. The most important clinical information – information that must be unequivocally documented in the medical record – is that one or more but less than four **acute and painful vertebral compression** fractures is/are present and that the patient’s pain is predominantly, if not solely, related to the demonstrated fracture(s).

This final LCD, effective 10/01/2015, combines JEA L34184 into the JEB LCD so that both JEA and JEB contract numbers will have the same final MCD LCD number

ICD-10 Codes that Support Medical Necessity**Group 1 Paragraph:**

Note: Diagnosis codes are based on the current ICD-10-CM codes that are effective at the time of LCD publication. Any updates to ICD-10-CM codes will be reviewed by Noridian, and coverage should not be presumed until the results of such review have been published/posted.

Two codes are required to describe the medical necessity of the procedure: one for the compression fracture and one to indicate pain. These are the **only** covered ICD-10-CM codes that support medical necessity:

Group 1: Compression fracture**Group 1 Codes:**
