Article Guidance

Article Text:

Mutations found in methyl CpG binding protein 2(MECP2) are associated with Rett syndrome. In classic Rett

syndrome, suspected cases are identified through specific clinical criteria in female children ages 1-5. Genetic testing is used to confirm the clinical findings. Since 99% of classic cases result in a single random mutation, genetic testing is not useful to screen carriers. Therefore, the MoIDX Team has determined that MECP2 genetic testing is not a Medicare benefit and is a statutorily excluded service. In addition to single disease testing, MoIDX will also deny panels of tests that include a MECP2 gene test as a statutorily excluded service.

To receive a MECP2 test denial, please submit the following claim information:

- Appropriate CPT code for test
 - 81302- MECP2, full gene sequence
 - 81303- MECP2, known familial variant
 - 81304- MECP2, duplication/deletion variants
 - 81470- X-linked intellectual disability genomic sequence analysis panel
 - 81471- X-linked intellectual disability genomic sequence analysis panel duplication/deletion
 - 81479-MECP2, panel
- An Advance Beneficiary Notice (ABN) is not required for statutorily excluded services
 - For a voluntary issued ABN, append with GX HCPCS modifier
 - To indicate a statutorily excluded service, append with a GY HCPCS modifier
- Select the appropriate diagnosis for the patient
- Enter DEX Z-Code™ identifier adjacent to the CPT code in the comment/narrative field for the following Part B claim field/types
 - Loop 2400 or SV101-7 for the 5010A1 837P
 - Item 19 for paper claim
- Enter DEX Z-Code™ identifier adjacent to the CPT code in the comment/narrative field for the following Part A claim field/types:
 - Line SV202-7 for 837I electronic claim
 - Block 80 for the UB04 claim form

Reference: Sec. 1862 (1)(A) Statutory Exclusion covers diagnostic testing “except for items and services that are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member,…”

Coding Information

Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

N/A

Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.
