**Article for Billing and Coding: Non-Invasive Fractional Flow Reserve (FFR) for Stable Ischemic Heart Disease (DA57405)**

Links in PDF documents are not guaranteed to work. To follow a web link, please use the MCD Archive site.

**Please Note: This is a Draft Article.**

Draft Articles are works in progress and not necessarily a reflection of the current billing and coding practices. Revisions to codes are carefully and thoroughly reviewed and are not intended to change the original intent of the LCD.

**Article Guidance**

![Retired](image)

**Article Text**

The information in the Supplemental Instructions Article contains billing, coding, or other guidelines that complement the Noridian LCD for Non-Invasive Fractional Flow Reserves for Stable Ischemic Heart Disease.

Procedure codes may be subject to National Correct Coding Initiative edits or OPPS packaging edits. Refer to NCCI and OPPS requirements prior to billing Medicare.

As this service constitutes post-procedure analysis of a previously performed study (CCTA), the name and NPI of the referring/ordering physician that submitted imaging data for FFRct review must be reported on the claim.

An Advance Beneficiary Notice of Non-coverage may be used for services that are likely to be non-covered, whether for medical necessity or for other reasons. Refer to CMS Publication 100-04, *Medicare Claims Processing Manual, Chapter 30* for complete instructions.

The patient’s medical record must document all of the following:

1. The clinical findings that led to the initial performance of the CCTA, and the CCTA must be fully reviewed before the performance of FFRct. (as evidenced by the submission of the Coronary Computed Tomographic Angiography Report)
2. Description of symptoms consistent with stable ischemic heart disease.
3. Body mass index
4. Fractional Flow Reserve analysis report

Additional ICD-10 Information
N/A

Bill Type Codes

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill
Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

N/A

Revenue Codes

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the article, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the article should be assumed to apply equally to all Revenue Codes.
