## **CMS National Coverage Policy**

Title XVIII of the Social Security Act (SSA), §1862(a)(1)(A) states that no Medicare payment shall be made for items or services that “are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member.”

Title XVIII of the Social Security Act, §1862(a)(7) and 42 Code of Federal Regulations, §411.15 et seq. exclude routine physical examinations.

Title XVIII of the Social Security Act, §1833(e) prohibits Medicare payment for any claim lacking the necessary documentation to process the claim.

## **Coverage Guidance**

### **Coverage Indications, Limitations, and/or Medical Necessity**

Intensity Modulated Radiation Therapy (IMRT) is a technology in radiation oncology that delivers radiation more precisely to the tumor while relatively sparing the surrounding normal tissues. It is an advanced form of three-dimensional conformal radiation therapy (3D CRT) that allows for varying intensities of radiation to produce dose

distributions that are more conformal than those possible with standard 3D CRT. It introduces inverse planning and computer-controlled radiation deposition, and normal tissue avoidance in contrast to the conventional trial-and-error approach.

The clinical objectives are defined mathematically and the IMRT optimization process determines the beam parameters that will lead to the desired solution while sparing normal tissues.

Examples of situations where IMRT is covered include tumors of the prostate, head and neck, brain, and paraspinal regions when needed to reduce the incidence and severity of the side effects of radiation, including compromise of visual function, mucositis, and xerostomia.

An IMRT candidate includes a patient who has already received a maximum amount of radiation delivered by conventional means. IMRT allows these patients to receive additional radiation safely, which can result in a prolonged survival and an improved quality of life.

**Coverage:**

One or more of the following required criteria for coverage must be documented in the medical record:

- The target volume is irregularly shaped and in close proximity to critical structures that must be protected.
- The volume of interest is in such location that its parameters can only be defined by MRI or CT.
- Important structures adjacent to, but outside the volume of interest are sufficiently close to the margin such that IMRT is required for additional safety and morbidity reduction related to radiation.
- An immediately adjacent area has been irradiated and abutting portals must be established with high precision.
- Tumor volume margins are concave and in close proximity to critical structures.
- IMRT is covered when the tumor tissue lies in areas associated with target motion caused by cardiac and pulmonary cycles, and the IMRT is necessary in order to protect adjacent normal tissues.

- Non-IMRT techniques would cause grade 2 or grade 3 radiation toxicity in greater than 15 percent of radiated cases.
- IMRT is the only option to cover the volume of interest with narrow margins and protect immediately adjacent structures.
- Only IMRT can produce dose distributions that can cover extremely concave target geometries.

## Coding Information

**Bill Type Codes:**

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

CODE	DESCRIPTION
999x	Not Applicable

**Revenue Codes:**

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all

Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.

CODE	DESCRIPTION
99999	Not Applicable
