CMS National Coverage Policy
Code of Federal Regulations:

42 CFR Sections 410.32(a) & 410.32(a)(3) require that clinical laboratory services be ordered and used promptly
by the physician (or other treating practitioner acting within the scope of his or her license and Medicare
requirements) who is treating the beneficiary.

42CFR411.15 excludes from coverage examinations performed for a purpose other than treatment or diagnosis of
a specific illness, symptoms, complaint, or injury with specific legislative enactments as the only exceptions.

CMS Manual System, Pub. 100-02, *Medicare Benefit Policy Manual*, Chapter 6, §§20.4.4 and 20.4.5.

Coverage Guidance **Coverage Indications, Limitations, and/or Medical Necessity**

Hormones, both endocrine and exocrine, are secreted into various bodily fluids and their measurement can often
diagnose diseases or be used to follow the course of a disease. Traditionally endocrine hormones are measured in
serum, plasma, or urine. Measurements of hormones at certain times of the day, or after various attempts at
suppression or stimulation can be used for diagnoses of endocrine diseases. Recently some labs have attempted
to develop measurement of hormones in salivary secretions. Material is collected from saliva and sent to a lab for
measurement. The convenience of collection without need of arterial or venipuncture simplifies collection, but the
accuracy of measurement and lack of standardization makes the values determined still investigational. Noridian
Healthcare Solutions currently considers salivary cortisol collected in the evening for diagnosis of Cushing's
syndrome as the only medically necessary and reasonable hormone measurement from salivary fluid. All other
determinations of salivary hormones (e.g., thyroid, testosterone, estrogen, parathyroid, growth hormone, etc.)
are considered investigational.

Summary of Evidence

Coding Information

Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

N/A

Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.

N/A

CPT/HCPCS Codes

Group 1 Paragraph:

Because current CPT^{reg} codes do not specify or identify "salivary" hormone testing from serum or urine hormone testing, claims for salivary levels of hormone should be coded with NOS code 84999 and the words "salivary cortisol". For other than cortisol use "salivary (name of other hormone)" which will generate a denial.

Group 1 Codes:

84999 UNLISTED CHEMISTRY PROCEDURE

ICD-10 Codes that Support Medical Necessity

Group 1 Paragraph: N/A

Group 1 Codes:

ICD-10 Codes

Description

ICD-10 Codes	Description
E24.0	Pituitary-dependent Cushing's disease
E24.2	Drug-induced Cushing's syndrome
E24.3	Ectopic ACTH syndrome
E24.4	Alcohol-induced pseudo-Cushing's syndrome
E24.8	Other Cushing's syndrome
E24.9	Cushing's syndrome, unspecified
E27.0	Other adrenocortical overactivity
E27.8	Other specified disorders of adrenal gland

ICD-10 Codes that DO NOT Support Medical Necessity N/A
