CMS National Coverage Policy  
Title XVIII of the Social Security Act, Section 1862(a)(7) excludes routine physical examinations. This provision excludes screening examinations.

Title XVIII of the Social Security Act, Section 1862(a)(1)(A) allows coverage and payment for only those services that are considered reasonable and necessary.

Title XVIII of the Social Security Act, Section 1833(e) prohibits Medicare payment for any claim, which lacks the necessary information to process the claim.

Title XVIII of the Social Security Act, Section 1862(a)(1)(D) prohibits Medicare payment for services and items that are experimental or investigational.

CMS publication 100-3, Medicare National Coverage Determinations, Sections 220.1 "Computerized Tomography", and 220.2 "Magnetic Resonance Imaging".  
Denies coverage of MRI for:

- 1. Measurement of blood flow and spectroscopy;**
- 2. Imaging of cortical bone and calcification;**
- 3. Procedures involving spatial resolution of bone or calcification**

Coverage Guidance

**Coverage Indications, Limitations, and/or Medical Necessity**

Note: Providers should seek information related to National Coverage Determinations (NCD) and other Centers for Medicare & Medicaid Services (CMS) instructions in CMS Manuals. This LCD only pertains to the contractor's discretionary coverage related to this service.

This policy addresses standard CT and MR imaging. *Magnetic Resonance Angiography (MRA) is not addressed in this policy.*

**Computerized Tomography (CT)**

Computerized tomography (CT scanning) uses the attenuation of an x-ray beam by an object in its path to create cross-sectional images. As x-rays pass through planes of the body, the photons are detected and recorded as they exit from different angles. Computers process the signals to produce a cross-sectional view of the body. The signal data may be subjected to a variety of post-acquisitional processing algorithms to obtain a multiplanar view of the anatomy.

**Magnetic Resonance Imaging (MRI)**

Magnetic Resonance Imaging (MRI) is a non-invasive diagnostic scanning technique that employs a powerful and highly uniform static magnetic field, rather than ionizing radiation, to produce images. Fluctuations in the strength of the magnetic field alter the motion and relaxation times of hydrogen molecules, which are related to the density of molecules and reflect the physicochemical properties of the tissues. Reconstructed images can be displayed in multiple planes to facilitate analysis. **See national non-coverage in CMS section above.**

Coverage is limited to those CT and MRI machines that have received pre-market approval by the FDA. Such units must be operated within the parameters specified by the approval.

Medicare coverage for CT scans is allowed provided the service is medically reasonable and necessary. Inconclusive findings on a CT scan may warrant a MRI study and, conversely, findings of a MRI study may be further clarified (under certain circumstances) with a subsequent CT scan. The information provided by the two modalities may be complementary.

Cancer Staging. Clinicians commonly use CT and MRI of the brain when metastatic involvement is suspected. Non-covered indications: esophagus, oropharynx, and prostate, and non-melanoma skin cancer in the absence of symptoms of brain involvement. "Certain tumors almost never metastasize to the brain parenchyma. These include carcinomas of the esophagus, oropharynx, and prostate, and non-melanoma skin cancers." (DeVita, Chapter 52.1) Accordingly, the related diagnoses found in the following diagnosis code list do not justify brain scans for "staging" purposes unless a patient has signs or symptoms suggesting brain involvement. Covered: In contrast, for those malignancies that commonly metastasize to the brain, staging in the absence of neurological findings may be appropriate.

Payment will be allowed for reasonable and necessary scans of different areas of the body that are performed on the same day.

## Coding Information

### Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

012x Hospital Inpatient (Medicare Part B only)  
013x Hospital Outpatient  
022x Skilled Nursing - Inpatient (Medicare Part B only)  
023x Skilled Nursing - Outpatient  
085x Critical Access Hospital

### Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.

## General Information

### Associated Information

Diagnostic evaluation of the head (head scans) and other parts of the body (body scans) performed by computerized tomography (CT) scanners is covered when the documentation supports that the scan is reasonable and necessary. Accurate coding information must be provided with claims to differentiate CT and/or MRI scans from other radiology services and to make coverage determinations.

Sufficient documentation such as, history and physical notes, laboratory results, signs and symptoms of the

disease to warrant the diagnostic test and to support the claim of reasonable and necessary must be included in the medical records. This information must be available to Medicare upon request.

The HCPCS/CPT code(s) may be subject to Correct Coding Initiative (CCI) edits in addition to guidance in this LCD. Please refer to the CCI for correct coding guidelines and specific applicable code combinations prior to billing Medicare. Whichever guidance is more restrictive should be adhered to.
